

Exhibitor Introduction

Name of Company	<i>Sung Won Forming</i>	Company Logo
President	<i>Yoon Hee Sung</i>	
Address	<i>34, Seonggok-ro 22beon-gil, Danwon-gu, Ansan-si, Gyeonggi-do, Korea</i>	
Website	<i>www.swf.co.kr</i>	
E-mail	<i>sjyoon@swf.co.kr</i>	
Tel.	<i>82-10-3137-2954</i>	
Contents of Exhibit	<i>Microwave & Millimeter wave components</i>	
Exhibitor Introduction	<p><i>SUNG WON FORMING, established in 1992, specializes in surface treatment technologies. With in-house machining centers and plating facilities, we handle both machining and plating processes internally. Additionally, we have developed and commercialized our own plating equipment, used both within our operations and sold to external clients.</i></p> <p><i>Through continuous R&D and investment, we have pioneered high-speed and uniform electroforming techniques, ultra-precision machining, and specialized functional plating, including wafer and semiconductor plating technologies. Our expertise has enabled us to produce advanced, technically differentiated products. These include microwave and millimeter-wave waveguide components, as well as heat shields, which are crucial in the aviation, space, and defense industries.</i></p> <p><i>We ensure top-tier quality with rigorous inspection processes using three-dimensional measuring instruments and advanced inspection machines. This commitment allows us to deliver reliable products and services that efficiently meet our customers' needs with precision and speed.</i></p>
